Frog quiz

- How many different native frog species does Australia have?
a) 52 b) 79 c) 112 d) 240 e) 385
- Which of these species is most threatened?
a) Corroboree Frog b) Cane Toad
c) Green Tree Frog d) Striped Rocket Frog
- Circle the correct answer. Australian frogs are threatened by:
a. Habitat loss
b. Climate change
c. Pollution
d. Parasites and disease
e. Introduced species
f. All of the above
- True or False? Some species of frogs can change their skin colour:
a) True b) False
- Circle all correct frog facts:
a. Many species begin life in water as eggs and then tadpoles
b. If you kiss a frog he will turn into a prince
c. Most frog species need moisture or water in order to breed
d. You will get warts if you touch a frog
e. They are found all over the world except in Antarctica
f. Many frog species can change colour to camouflage themselves
- How can you help? Circle the correct answer:
a. Help count our frogs using the FrogID app
b. Build a frog friendly habitat in your back garden or school
c. Avoid using pesticides in your garden
d. All of the above

See correct answers at the bottom of reverse page

Frog skin is amazing: frogs can breathe and drink through it!

Blue Mountains Tree Frog (*Litoria citropa*)

Frogs can only detect moving prey. Their eyes focus by moving the lens rather than the lens changing shape, like it does in mammals.

Southern Corroboree Frog (*Pseudophryne corroboree*)

Frogs come in many colours, some of which help to camouflage them.

Did you know?

Frogs are amphibians. The word amphibian comes from the Greek word 'amphibios', which means "to live a double life". This refers to most amphibians having two parts to their life cycle - the first in water during the egg and larva stage and the second on land during the adult stage.

Help us save Australia's frogs

Croaks, whistles, bleats and barks – did you know that every frog species makes a different sound? FrogID is Australia's first national frog count created to save some of our most threatened species.

By recording a frog call with the FrogID app you can discover which frogs live around you and help us count Australia's frogs. Here is how you can help:

- Download the FrogID app and create an account at FrogID.net.au
- Explore your local neighbourhood and listen out for the calls of your local frogs
- Record any calls and match them to similar calls on the FrogID app
- Wait for your call to be verified by the Australian Museum team of scientists

Download the FrogID app now to become a Citizen Scientist and help us save some of our most threatened species.

Cape York Graceful Treefrog (*Litoria bella*)

National Frog Pond Building Project

The Australian Museum and Bunnings have partnered to engage schools across Australia and assist them in building 'frog-friendly' environments to help Australia's frog populations thrive.

If you think your class would like to get involved, ask your teacher to contact the Activities Organiser at your local Bunnings store to discuss how you can get involved with the National Frog Pond Building Project. bunnings.com.au/stores

MAJOR PARTNER THIS PROJECT RECEIVED GRANT FUNDING FROM THE AUSTRALIAN GOVERNMENT PARTNER SUPPORTING PARTNER
