

McGuire VCAL - 1st May 14

Yesterday we went to the lake to understand about different things like we saw different birds and there was a man he was talking about the lake. We also went canoeing. It was really fun and we had to be partners to sit on the canoe.

Today went to the RiverConnect with all our classmates and we learned when the lake was made and who looks after it. And why they made it. We walked in the bush.

22 May 14

Today we went to the RiverConnect again from class and there was a man he was talking about bugs and also he told us how they live and how many different ones there are in the world.

We had to go and find different bugs and put it in the container.

12th June 14

Today was our last day at the RiverConnect. The girl Bonnie taught us how to plant trees and we had to plant trees ourselves. First I thought I'm not going to do this and then when I looked everyone was doing good work and it was enjoyable. I went and helped them too. I put a few trees in the ground. It was really fun. I had good day but the weather was a bit cold.

We also went for a walk all around the river. It was fun and we had to follow the map.

We also learned about the local indigenous history during the Flats walk with Leon. That day we had a great day with everyone.
